MATHIOS REFRACTORIES S.A. Announces the Installation of a New Photovoltaic System at Its Headquarters

Athens, 20/06/2024 - MATHIOS REFRACTORIES S.A. is pleased to announce the completion of the installation of a state-of-the-art 135 kW photovoltaic system at its headquarters in Athens. This new installation represents MATHIOS REFRACTORIES S.A.'s commitment to promoting sustainable development and green energy. By harnessing solar energy, the photovoltaic system is expected to generate approximately 600 kWh of electricity daily during the summer months, covering a significant portion of the company's energy needs.

Benefits of the Installation:

- **Reduction of Environmental Footprint:** Using solar energy reduces carbon dioxide and other pollutant emissions, contributing to environmental protection.
- **Energy Autonomy:** The photovoltaic installation will enable MATHIOS REFRACTORIES S.A. to reduce its dependence on the electrical grid and energy price fluctuations.
- **Economic Benefits:** Producing own energy will lead to significant reductions in operational costs while providing stability in energy expenses.
- **Enhancement of Corporate Social Responsibility:** Investing in renewable energy sources underscores the company's commitment to corporate social responsibility and support for sustainable development.

Statements

The Vice President of MATHIOS REFRACTORIES S.A. stated: "Investing in photovoltaic panels is an important step towards sustainable development and energy autonomy. We are proud to actively contribute to reducing our environmental footprint and promoting green practices." MATHIOS REFRACTORIES S.A. remains dedicated to adopting innovative solutions that promote sustainability and environmental protection while enhancing the company's efficiency and competitiveness.
