Mathios Company History

Founded in 1890, Mathios Refractories has developed into one of the biggest production, commercial and construction units of its kind globally and the only one in Greece. The company has a worldwide customer base and a network of partners leading to exports to more than 50 countries, having hence built a significant and solid expertise

Over 130 years of history

1890 Founding of the “Mathios Company”. Dimitris Mathios establishes a personal company with the scope of constructing & repairing refractory projects (furnaces, smoke stacks etc.).

1955 The personal company switches to I. Mathios Bros. LTD active in the industrial refractory construction and the production & trade of refractory materials, contributing to the industrialization of Greece.

1985 The Company converts to Mathios S.A. The present BoD takes over.

1990 It begins the production of handmade stone cladding and starts exporting.

2002 Mathios GmbH & Mathios AD subsidiaries establishment

2000 IPO in Athens Stock Exchange. Fully automated production plant for architectural stone in Athens, Greece.

2005 Ideal Refractories company acquisition

2011 Stone production plant in Bulgaria inauguration

2019 Sustainability embedded in the core of our strategy & culture.

2022 Adopting principles of the circular economy in the Refractories production.

2024 Environmental friendly stone casting using recyclable molds which minimize waste and ecological footprint.

Environmentally Friendly

Looking at environmental challenges, we, at Mathios Stone, have been long ago dedicated to preserving this world for generations to come. As a leading global producer of architectural stone veneers, we are therefore fully committed towards developing environmentally conscious products.

DESIGNED WITH PEOPLE & THE ENVIRONMENT IN MIND

We understand very well that developing new stone products should be done responsibly. This is why every new product we design is assessed not only from aesthetic but also from an environmental point of view, taking into consideration not only the material it is made of but most importantly its life-cycle and recycling options. Developing a truly sustainable product however encompasses a lot more than just using eco-materials to produce it.

All our stone products are designed in such a way that they are resource efficient, have an enhanced life-cycle and a 100% recyclability.

WE INTERRUPT AN OUTDATED HABBIT

While quarry stone is a natural and durable material, the extraction process can have environmental impacts. Although many quarrying operations adhere to relevant regulations and environmental standards to minimize negative consequences, it is quite common to end up in abandoned open quarry pits. These can pose various environmental and safety risks, from accidental falls to local ecosystems disturbance and negatively impacting the scenic quality of the area.

RESPONSIBLE DEVELOPING, PRODUCING & RESOURCE MANAGEMENT

Because how we produce our products has a direct impact on the environment, we are truly devoted towards making ongoing improvements to our production processes and logistics. To make sure our commitments towards becoming more sustainable are met, we also expect all our suppliers to join us in this journey and make sure that all materials we use are sourced, processed, and produced in an ethical and environmentally friendly way. The materials we use come from companies that are strictly committed to effective management and rehabilitation of quarries as well as sustainability. The aggregates we apply are sediments and natural accumulations. Unlike materials extracted from quarries, sediments and natural accumulations can be considered a renewable resource because are constantly replenished through natural processes like erosion and weathering involving less habitat disruption and ecosystem alteration.

FOCUS ON RECYCLING & RECYCLED RESOURCES

We give priority to using materials with a good recyclability and make sure that the products we develop maintain their value throughout their whole lifecycle and use recycled materials where possible. All packaging is made of recycled paper and is 100% recyclable. That reflects our promise to responsible environmental stewardship, efficient resource utilization, and the advancement of circular economy principles.

MATHIOS SMART STONE

Mathios Stone is lightweight (up to 40% lighter than quarry stone) due to advanced technological materials. So, it is easier to handle, transport, and install compared to heavier alternatives, such as quarry stone. This can lead to reduced labor costs and increased efficiency during construction or installation processes. It requires less fuel for transportation, leading to reduced transportation costs and lower carbon emissions. They come in precut pieces ready to use, ensuring that they fit together seamlessly for a higher aesthetical result. They eliminate the need for on-site cutting and shaping, saving time during the construction process, and reducing labor costs. There is also minimal to no waste generated during the construction process in alliance with sustainable construction practices. The lightweight nature of Mathios Stone allows for greater flexibility and versatility in design. It can contribute to a reduced structural load on buildings and infrastructure. Last but not least, it can be applied on various surfaces including thermal insulation systems contributing to the overall energy efficiency of structures. Finally, Mathios Stone has three times lower heat capacity than extracted stone. During the summer, it does not absorb heat and helps maintain a cooler surface, reducing the impact of external heat. In contrast, during the winter, it acts as an insulator retaining heat within a space and potentially lowering the need for additional heating.

AIR QUALITY, HUMAN HEALTH & ENVIRONMENTAL SUSTAINABILITY

Mathios Stone products do not contain substances harmful to human health and the environment. Being Certified A+ for VOC emissions signifies that Mathios Stone has undergone testing and has demonstrated very low emissions of volatile organic compounds, which are known to contribute to indoor or outdoor air pollution and health problems.

BEYOND A STANDARD DEVELOPMENT TEAM

We, at Mathios Company, have formed an interdisciplinary team to fulfill our commitment to delivering environmentally conscious products through sustainable production. Designers, engineers, sustainability experts and product developers bring diverse expertise to the table, ensuring that sustainability considerations are embedded in various aspects of the product development process. To further drive innovation and excellence, we partner with academic institutions, leveraging their research capabilities, novel ideas and fresh perspectives.

SENSIBLE PRODUCTION & INTELLIGENT LOGISTICS

Resourceful manufacturing is only half the way. Aiming to minimize our carbon footprint, we continuously invest in using renewable energy for our manufacturing facilities. We also prioritize optimized palletization to reduce transportation impacts reflecting our mission for efficiency and sustainability in our logistics and supply chain operations.

Mathios Stone

Artisanal

Bridging Tradition with Sustainable Architecture.

Architecture, at its essence, is about connection between materials and environments, between tradition and innovation, and ultimately between past, present, and future. Just as ancient Greek stone bridges represent architectural ingenuity and craftsmanship passed down through generations, the Mathios Stone Artisanal Collection stands as a contemporary bridge, linking traditional masonry artistry to today's sustainable architectural practices.

Each piece within this distinctive collection encapsulates the genuine textures and refined aesthetics of historic European and Greek masonry. At a moment when the heritage of traditional artisanal stonework is under threat of disappearing, Mathios Stone carefully preserves this irreplaceable legacy. Through meticulous craftsmanship and detailed reproduction of authentic patterns, these stones embody the character and depth of historic architecture, keeping alive the delicate art of hand-shaped stone textures and traditional masonry techniques.

Yet, preserving tradition does not mean standing still. Mathios Stone integrates the authenticity and beauty of artisanal designs seamlessly into modern building methods. Manufactured sustainably from natural materials, our collection meets the practical demands of contemporary architecture, providing ease of installation, durability, and exceptional design flexibility.

Choosing Mathios Stone's Artisanal Collection means actively bridging the craftsmanship of yesterday with the innovative, sustainable vision of tomorrow. It is an architectural statement of respect toward heritage, an investment in quality and authenticity, and an expression of timeless beauty reshaped for modern life.

Isola

Irregular long combinations of ledge stone create the unique structure of Mathios Stone Isola. Compared only to nature’s resourcefulness, it comes in 10 earthy color combinations matching every space and application allowing you to create a masterpiece of stonework.

Artisanal Stones

Orvilos

The epitome of rustic stone. Orvilos captures the essence of nature’s rugged beauty with its weathered, aged, or rough-hewn appearance. Its irregular shapes, textured surfaces, and earthy tones evoke a profound sense of authenticity, warmth, and charm. Whether adorning exterior facades, accentuating interior spaces, or enhancing landscaping features, Orvilos by Mathios Stone infuses environments with a distinct character and a connection to the natural world, creating spaces that feel both cozy and captivating.

Cervino^S

Cervino with different-sized stones in earthy tones creates a fascinating interplay of textures and colors, blending seamlessly into indoor and outdoor spaces. It harmoniously merges natural beauty with modern design, transforming your surroundings into an aesthetic masterpiece.

Cervino, a truly unique stone, is available in two captivating colors: White and Ivory.

Champagne offers various earthy shades for a warm, rustic feel, while White consists of pure white stones for elegance and timelessness.

Mathios Stone

Contemporary

Mathios Stone Contemporary Collection exemplifies a commitment to simplicity, innovation, and functionality, all while integrating naturally inspired elements. Neutral colors such as white, gray, beige, and black create a sense of calmness and sophistication. Combining different stone types, colors, or finishes can create striking visual contrasts that add depth and interest to a space, while maintaining balance in the design.

Mathios Stone Contemporary line integrates seamlessly with other materials such as glass, metal, or wood. This interplay of materials enhances the overall aesthetic and allows for creative expression. This blend of modernity and natural beauty ensures that your designs resonate with a wide range of tastes and preferences, offering versatility and enduring elegance to your projects.

Tivoli^S

Tivoli has been inspired by the famous travertine stone, largely selected by Italian sculptors like Bernini and Michelangelo and used for Roman monuments, aqueducts and amphitheatres like the legendary Colosseum.

Mathios Stone Tivoli combines the famous texture with the advantages of the architectural stone. It is ideally used for façades and wall cladding and creates appealing look when combined with metal and glass.

Mathios Bricks

Whether you're a connoisseur of time-worn aesthetics or a devoted industrial design aficionado, the world of brick offers an abundance of opportunities to craft a distinctive architectural fusion. Bricks, with their enduring charm and versatile nature, serve as the canvas upon which you can paint the story of a space, blending tradition with innovation.

From rustic red bricks reminiscent of a bygone era to sleek, minimalist gray bricks that evoke an urban, contemporary vibe, your choice of bricks can set the tone for your architectural masterpiece. The possibilities are endless, and the design journey is an exciting one, as you explore the myriad textures, colors, and patterns that bricks can offer.

Kerabrick^S

The Kerabrick line was developed for those who prefer simple applications without compromising quality.

The color combinations offer unique warmth in the environment and at the same time cover the design recommendations of every architectural creation.

Kerabrick is the ideal solution for covering internal and external areas while combining esthetics, quality and technology.

The durability in high pollution environments, in extreme weather conditions, the water absorption, and the stability of its natural and chemical characteristics are only some of its characteristics.

Column Cap

Column caps are architectural elements designed to provide a finishing touch to the top of columns or pillars. They serve both aesthetic and practical purposes, enhancing the appearance of the column while also protecting it from weathering and damage. Column caps can be produced in various colors to complement the tones of Mathios Stone collection ensuring a seamless integration with the rest of the architectural design.

Accessories

Water Table

Water tables serve multiple important purposes, combining functionality with aesthetic appeal. They provide essential protection against water damage by helping redirect rainwater away from the building’s foundation. Particularly in regions with heavy rainfall or where buildings were susceptible to water damage and moisture, they prevent potential damage caused by water flowing down the walls. Mathios Stone Water Tables also offer a versatile solution for architectural design. By crafting them in the same color hue as other stone elements, such as walls or trim, they seamlessly integrate into the design, adding visual interest and coherence to the overall appearance.

Accessories

Wall Cap

Wall cap or capstone is a shielding and decorative feature placed on top of a wall. It protects the top of the wall from water penetration, weathering, and other forms of moisture damage. Similar to a water table, a wall cap helps divert rainwater away from the wall’s surface. Usually, they are installed at the top of retaining walls, garden walls, parapet walls, or other vertical surfaces. Beyond their practical function, Mathios Stone wall caps are custom-designed to match the specific stone used in the construction of the wall. This ensures that they seamlessly blend with the overall architectural design and enhance the aesthetic appeal of the entire structure.

Window Trim Vertical

Vertical window trims are installed around the perimeter of a window, in general on the sides and run vertically from the top to the bottom. They add detail to the exterior of a building and help define the shape of the window creating a polished look. Window trims also help to seal and protect the edges of the window from moisture, drafts, and other weather-related issues. When they are properly installed, they can help prevent water infiltration and improve energy efficiency. Window trims also provide additional structural support for the window frame and surrounding wall. Mathios Stone Window Trims are customized to blend with the specific stone used in the construction of the building.

EXTRA STONE GLUE

Extra Stone Glue.
The Right Adhesive for your Project.

Before starting your stonework it is important to select the correct bedding adhesive to ensure efficient stone bond and high performance. Extra Stone Glue is a Special Acrylic heavy duty elastic adhesive especially composed for manufactured stone veneers & brick slips. It has high adhesive strength and is applicable on internal and external surfaces.

Additionally, its high durability to extreme temperature conditions (humid, heat or frost) make Extra Stone Glue the ideal choice regardless of the location and the installation surface.

It is categorized as C2TES1 type according to EN 12002

MATPROTECT

Mat Protect Plus.
Protect your stonework

Mat Protect is a silicon varnish protective treatment that safeguards the beauty of architectural stone veneer.

Designed to provide a highly effective ability to resist penetration by water, it is a colorless waterproofing treatment for exterior and interior, ready to be applied without any dilution, over the stones.

Due to its composition, it provides lower porosity which results in anti-freezing protection and tolerance in chlorine water. Mat Protect is recommended for buildings, water pools, floors, walls, and walkways close to the seaside and exposed to chlorine water and sea-spray.

MATFIX 50

Mat Fix 50.
Super Flex Acrylic Power

MATFIX 50 is an elastic adhesive used for adhesion of tiles, natural/handmade stones, vitreous mosaics, clinker, porcelainized gres on highly demanded surfaces. It is applied on internal and external surfaces.

MATHIOS[®] *Grout*

Create your own stonework with Mathios Grout, the ideal choice for Natural & Architectural Stone. Produced by high quality cement, new generation aggregates and reinforcing additives, Mathios Grout provides high mechanical strength and excellent workability. It is fully waterproof and easy to clean.

It offers possibility of filling joints from 10mm to 50mm and is suitable for application to both internal and external surfaces. It is available in 13 color shades, indelible in time and in two grain sizes. Combine them with the grout style you wish and see how you can recast your stone.

Picking your grout technique according to what you’re trying to achieve is as important as selecting the stone.

Standard grouting style

The most common technique is to lay each stone one finger width apart from each other and grout between each stone. The grout is deeper than the face of the stone and exposes the stone edges. If the grout color pairs with the hues of the stone, this makes mostly the stone stand out. For contrasting design result pick up a bold color grout opposite of the stone color.

Overgrout style

The mortar overfills the joints and overlaps the face of the stone. A very popular technique to achieve a rustic and authentic old-world look. It gives such a realistic result to the construction that it’s hard to believe it’s not centuries ago built. Ideal for irregular shaped stones and brickslips. It would also fit nice in an industrial design loft.

Flat with the stone face grout style

The grout level is almost flat with the face of the stone. Similar to the standard grouting style but with more active role on the final design. Try to use different color grout and see how your stonework transforms. For a discreet and always in style look match the grout color with the dominant color shadings of the architectural stone. On the contrary, if you love impactful effect, select grout color opposite of the stone color. With light stone, use dark grout, and with dark stone use light grout.
